#### American Opinions on Trump's Proposed Social Security Plan

How do you feel about plans to eliminate the partial income taxation of Social Security benefits for seniors earning more th 34,000 USD annually (or 44,000 USD total for married couples)?

```
ggsave("descriptive_trump.png", width = 7, height = 5, dpi = 600)
```

#### Organizing Data for Harris

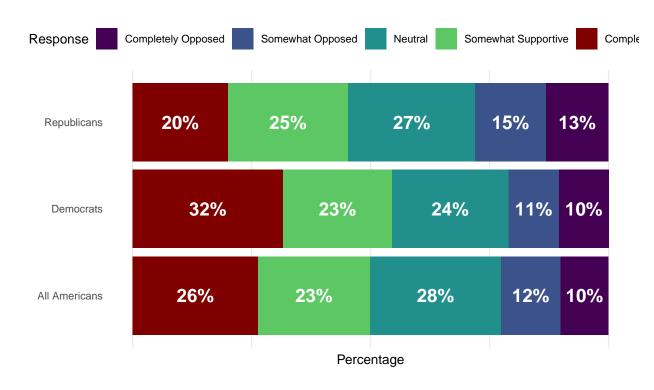

##Plotting Harris

```
ggplot(stacked_data, aes(x = Group, y = Percentage, fill = NJ5)) +
  geom_bar(stat = "identity", position = "stack") +
  geom_text(aes(label = paste0(round(Percentage, 0), "%")),
            position = position_stack(vjust = 0.5),
            size = 5,
            color = "white",
            fontface = "bold") +
  coord_flip() +
  scale_fill_manual(values = c("Completely Opposed" = "#440154FF",
                                "Somewhat Opposed" = "#3B528BFF",
                                "Neutral" = "#21908CFF",
                                "Somewhat Supportive" = "#5DC863FF",
                                "Completely Supportive" = "#800000")) +
  labs(
   title = "American Opinions on Harris's Proposed Social Security Plan \n",
   subtitle = "How do you feel about plans to add a new tier of Social Security tax collection for Ame
   x = "",
   y = "Percentage",
   fill = "Response"
  ) +
  theme_minimal(base_size = 10) +
  theme(
   plot.title = element_text(hjust = 0.5),
   plot.subtitle=element_text(hjust = 0.5),
   panel.grid.major.y = element blank(),
   panel.grid.minor = element_blank(),
```

```
axis.text.x = element_blank(),
axis.ticks.x = element_blank(),
legend.position = "top"
)
```

## American Opinions on Harris's Proposed Social Security Plan

w do you feel about plans to add a new tier of Social Security tax collection for Americans within the higher

```
ggsave("descriptive_harris.png", width = 7, height = 5, dpi = 600)
```

#### Transferring Regression Tables to Word

#### Ordinal Regression 1: Importance

```
coef(summary(ordinal_model_imp))
```

```
